ABOUT

Senior Mobile Application Developer with 6+ years of experience building production-grade iOS, Android, and Flutter applications. Specialized in Swift, SwiftUI, UIKit, Kotlin, clean architecture, secure payment flows, offline-first data, performance optimization, and end-to-end store delivery.

EXPERIENCE

Senior Mobile Application Developer Nov 2023 - Present
Periscope Labs Limited

- Lead production iOS and Android delivery using Swift, SwiftUI, UIKit, and Flutter/Dart.
- Architect offline-first data layers with Codable and CoreData; integrate Crashlytics and push notifications.
- Own provisioning, App Store submissions, compliance, and release coordination.
- Collaborate with product, design, backend, and QA teams throughout each release.

Senior Mobile Application Developer Feb 2023 - Oct 2023
Pathao

- Developed Transaction List, Split Transaction, and Transaction History for Pathao Pay.
- Implemented Face Recognition authentication for secure payment access.
- Optimized search and list rendering for smoother high-volume payment flows.
- Collaborated with designers and backend engineers on production-ready iOS features.

Mobile Application Developer Dec 2020 - Jan 2023
Parcelmagic

- Shipped native iOS and Android rider apps for pickup, live delivery tracking, and earnings.
- Integrated Google Maps, FCM task alerts, custom UIKit animations, and reusable layouts.
- Optimized reliability and performance for lower-end devices.
- Implemented real-time status updates for reliable day-to-day rider operations.

Android Developer Jan 2020 - Nov 2020
Innovative Technology & Engineering

- Built and released Android applications using Kotlin, Java, Retrofit, Room, and SQLite.
- Implemented push notifications, deep linking, background services, analytics, and crash monitoring.
- Published and maintained production applications on Google Play.
- Used Firebase Analytics and Crashlytics for data-driven quality improvements.

SKILLS

Swift / SwiftUI / UIKit

Kotlin / Java / Android SDK

Flutter / Dart

MVVM / MVVM-C

Clean Architecture

REST APIs / JSON

CoreData / Room / SQLite

Firebase / Crashlytics

APNs / FCM

OAuth / JWT / SSL Pinning

Performance Optimization

App Store / Google Play

TOOLS & SERVICES

Xcode Android Studio

Git / GitHub Fastlane / CI/CD

CocoaPods / SPM Google Maps

XCTest / XCUITest bKash / SSLCommerz

EDUCATION

B.Sc. in Computer Science & Engineering

Hajee Mohammad Danesh Science and Technology University, Dinajpur

2015 - 2018 | GPA 3.0 / 4.0

LANGUAGES

Bangla - Fluent English - Fluent

SELECTED PROJECTS

Pathao Pay	Fintech wallet, secure transactions, split payments, Face ID.	Parcelmagic	Rider pickup, maps tracking, delivery, and earnings.
Centrixa	CRM pipelines, activities, deals, and offline synchronization.	Muslim Life	Quran, Qibla, Hadith, and essential Islamic content.
Quore	Hotel operations, staff tasks, and role-based access.	My ISP	Digital ISP bill payments through cards and mobile wallets.
